Description

Constructor small parts shelving S90 is supremely versatile and adapts to all your requirements – this is our main concept and the basis for the system.

The Constructor small parts shelving system with its basic elements and a multitude of accessories is guaranteed to meet all kinds of small parts storage needs. The Constructor small parts shelving concept is based on two standard uprights and a range of shelves with different load bearing capacities.

Our fully automated, ultra-modern production lines guarantee an end product with high quality and exact measurements for easy assembly.

Small Part Handling > S90 - standard

Products

The basic elements of the Constructor small parts shelving system provide single level as well as multilevel shelving systems up to 18 meters high fully automated central warehouses and distribution centres.

The basic elements are made of high quality cold rolled steel sheet formed in automated production lines.

Surface treatment is either powder coating after meticulous non-toxic environmental friendly cleansing and iron-phosphating or galvanizing.

Heights from 2.000 to 18.000 mm.
